A Message of Importance

THE Dutch government, realizing the chaos in the bulb industry in Holland owing to unfair competition the past few years, has taken a hand in its reorganization to the benefit of grower, exporter and consumer.

We say "unfair competition" and such it was, realizing that surpluses were shipped to foreign countries at any price to compete with legitimate business and in many cases very poor quality being offered to a public not fully acquainted with bulbs, even if the prices were attractive, was decidedly **unfair**.

Also, considering that numerous copies of cheap literature distributed through the mails, offering bulbs at prices below cost of production by unscrupulous dealers with promises which could not be kept, these all added to the chaos existing everywhere and which was detrimental even to the consumer.

In view of the above, now more than ever, do not be misled by cheap offers or impossible promises but let our conservative mind again realize the fact that the old slogan

"A Good Article Is Worth The Price"

should once more lead us to stability, quality, service and peace of mind through gardening, to the benefit of the people of this great country of ours, the United States of America, and of the entire world.

We grow Tulips, Hyacinths, Daffodils, etc., in quantity especially for our select trade.

Free Delivery on All Bulbs

All merchandise traveling any distance usually becomes expensive on account of the transportation charges, which have to be added to the price of the goods.

When you agree to our competitive prices for the finest quality bulbs, you have no further expenses, as we agree to deliver them in your home town charges prepaid if full cash accompanies the order.

The cost of this service is not added to our prices, but deducted from our revenue in order to back our slogan:

FRENCH BULBS for Early Forcing

AMERICAN GROWN

The two varieties named below have been grown for us in the United States and are due to arrive at our packing house in August. They can be delivered upon arrival or at the time your order is received, for immediate planting in order to have early flowers. Follow the directions given with each variety, and you will have an abundance of dainty, attractive flowers in early winter. We start our book with these bulbs as they are the earliest flowering bulbs we offer.

Lilium Candidum

This is the exquisite Madonna Lily, which produces a large mass of snow-white flowers on straight stems. Plant these bulbs in the open in September or October, and protect them well from frost, as they are not extremely hardy, and during May or June you will have an abundance of flowers. Can also be planted in pots and by putting them in a cold frame for 3 months, well protected, then taking them into a greenhouse, the same success will be yours. Jumbo bulbs only, 35c each; \$3.50 per doz.; \$25.00 per 100.

Golden Yellow
Narcissus.

Paper-White Narcissus.

Paper-White Narcissus

Suitable for Growing in Water and Gravel,
Sand or Fibre

We handle only the **Giant Grandiflora** variety, which is a great improvement over the ordinary Paper-White Narcissus. It can be had in bloom from Christmas until Easter, either in pots, bowls or boxes. Upon arrival, plant them immediately, if wanted early, and put in a cool place in cellar or pit, free from frost. When well rooted they can be taken into heat, and if watered freely they will produce an abundance of beautiful blooms. They are not hardy. Jumbo or Exhibition Size, \$1.00 per doz.; \$7.50 per 100; \$70.00 per 1000.

Golden Yellow Narcissus Soleil d'Or

Soleil d'Or resembles the Paper-White Narcissus very much, in habit, but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paper-White Narcissus. We expect to have some very fine stock of this variety to meet the steadily increased demand of the past few seasons. Do not forget to order a few and get acquainted with this wonderful flower. We offer only the Exhibition Size, \$2.50 per doz.; \$18.00 per 100; \$160.00 per 1000.

GIANT DARWIN TULIPS

(May-Flowering)

The Pride of the Garden

These Tulips have created a real sensation for the past few years, and one really does not wonder when seeing them in full bloom. They got their reputation through merit alone. They are most brilliant in color and of the greatest variety of shades. Each flower is extremely large, thereby producing a most gorgeous show in any garden, either in beds, borders or among shrubbery. With the exception of a few varieties, they are not very satisfactory indoors, and one must be an expert grower to flower them in the house at all, but they never fail outdoors.

TULIPS

for Outdoor Culture

Clara Butt Tulips.

If soil is loosened about 12 inches deep before planting and if possible mixed with leaf mold or well-rotted stable manure the best results can be expected. Tulips should be planted 4 inches below the surface of the ground. Cover them after the ground is frozen, although covering is not strictly necessary. Remove covering in the spring when tops are approximately 4 inches high.

Culture for Indoors

For indoor culture see our directions, which we supply with each order.

City of Haarlem Tulips.

Inglescombe Yellow Tulips.

Old English COTTAGE TULIPS

May-Flowering

The Tulips belonging to this class owe their name to the fact that many of them had been found growing about country houses and cottages in England and France generations ago. In the hands of skillful gardeners, and by careful hybridizing and selecting the best soil that could be found, the selection has become very extensive. All imaginable colors are now represented in this class. They all have long stems and very graceful formation and are therefore unsurpassed for the garden and excellent for cutting.

Majestic BREEDER TULIPS

These Tulips, although formerly listed among the Cottage varieties, form a distinct class in themselves, being an unbroken form of the old-time Florist's Tulip. The Breeders, strange to say, were discarded by their originators, the old Dutch gardeners, because they had no stripes or feathers, and until recently they were placed in the background of borders and other obscure places. Now that a taste for art colors has been awakened, together with a desire for bronze, brown, and buff tones, attention is again drawn to these old-fashioned Tulips, and within a very few years they have become the most popular of all the late Tulips.

They well deserve their popularity, not only for their peculiar and artistic coloring but for their lasting qualities as well, for this makes them unusually well suited for garden decoration, slow forcing, and cut flower use. In size of flower, length and strength of stem, and general beauty they far excel the Darwins.

This class of Tulips will prove very interesting on account of their peculiar forms and different habits of growth.

Unusual Offering of Mixed Tulips

We grow no mixtures. All Tulip mixtures are made up separately for each order at the time of shipment and they are made up of the same size bulbs as our named varieties.

We use twelve different varieties to make one dozen Tulips, and many more, of course, for making up a hundred or a thousand mixed Tulips, always visualizing the garden effect Tulips have to create.

HYACINTHS

Hyacinths will grow in any good soil but they prefer a rich light soil. The method of growing is as simple as that of Tulips but when planted in pots the top of the bulb should be level with the surface of the soil, and plenty of water should be given when in the house or conservatory. When planted outdoors they require 6 inches or more of cover (preferably light) after the first sharp frost, as they are not as hardy as Tulips, the cover to be partly removed after the middle of March if there is no snow.

Miniature or Dutch Roman Hyacinths

These are the Hyacinths used for growing in bulb-pans, and if planted 10 to 12 bulbs to an 8 or 9-inch pan, they cannot be surpassed. They are apparently small bulbs but in comparison to their size they produce immense flowers. On account of their low price and splendid results, they are very much in demand for house culture. By planting only one kind in a pan, the best results can be obtained, as then they produce an even growth. By following the same cultural directions as given for the Hyacinths, failure is impossible. They are also greatly used for bedding.

NARCISSUS or DAFFODILS

In order to have a beautiful bulb garden, Narcissi should be planted very freely. They thrive in practically any climate in the United States and it is small wonder that the demand is doubling every year. They are not only excellent for outdoors but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut-flower purposes with every American gardener. We have compiled a list (as short as we could make it) of the best and most attractive varieties for indoor, and exhibition purposes, and it is complete and easy to select from.

Culture. The same as Tulips, although they should be planted as close as possible in the open or pans. After active growth commences, give plenty of water.

Culture Outdoors. They should be planted so that the top of the bulb is at least 5 inches beneath the soil. A little protection should be given during severe winter weather, although they are perfectly hardy.

In our descriptions we use the following terms: **Perianth**—the outer petals of the flower. **Trumpet**—the long cup or trumpet-shaped center. **Crown or Cup**—the short or flat center.

Explanation of Daffodil Classes and Types

YELLOW TRUMPET varieties have trumpets which as a rule are longer or as long as the perianth segments (petals). They usually have a light or deep yellow perianth with a trumpet of deeper yellow.

BICOLOR varieties have creamy or pure white perianth segments and yellow trumpets.

BARRI varieties have light or deep yellow perianth segments and an expanded crown instead of a trumpet, which is light or deep with red or orange edge.

INCOMPARABILIS varieties have light or deep yellow segments, a crown of light or deep yellow very similar to a short trumpet.

LEEDSI varieties always have white segments, while the crowns are white or light yellow. They are very dainty.

POETICUS. Snow-white segments, crowns usually heavily rimmed orange or scarlet with a green eye in center of crown.

POETAZ. Cluster flowered in white, light or deep yellow. Some varieties have orange or red rimmed small crowns.

JONQUILS. Usually bear small flowers in small or large clusters on one stem, and usually are sweet scented.

Imported and Native DAFFODILS

Wonderful varieties among the always popular species of early spring flowers

ALBATROSS. (Barri). White perianth and pale citron yellow cup, edged orange red. Doz., \$1.00; 100, \$6.00.

AMETHYST. (Leedsi). A snowy white variety that is full of life and very beautiful. Each, 50c; doz., \$5.50; 100, \$40.00.

AMBASSADOR. (Incomp.). Large pure white perianth with well-formed petals. Creamy white cup. One of those gorgeous novelties hard to do justice in a description. Each, \$1.00; doz., \$10.00; 100, \$75.00.

ALCIDA. (Barri). Star shaped, creamy white perianth, large, flat, yellow cup with flaming orange-scarlet edge. Each, 35c; doz., \$3.50; 100, \$25.00.

APOTHEOSE. (Trumpet). An enormous most striking and imposing flower of immense substance. The broad, well closed perianth is pure canary yellow, while the large, broad ending, elegantly recurved trumpet is of a deep canary yellow. Promises to be one of the "leaders" of the future. Each, \$1.00; doz., \$10.00.

BABYLON GLORY. (Yellow Trumpet). Enormous, well shaped, golden yellow flower. One of the finest. Each, 65c; doz., \$6.50; 100, \$50.00.

BERNARDINO. (Incomp.). Large creamy perianth, pale yellow cup, orange rimmed. Doz., \$2.00; 100, \$15.00.

BIANCA. (Leedsi). Solid white perianth, clear yellow cup. Doz., \$1.00; 100, \$6.00.

BOERHAVE. (Poetaz). New, pure white with sulphur yellow eye; like most of our own new type, Poetaz Narcissus, it forms freely arranged individual flowers which have longer stems, so getting away from the old idea of Poetaz Narcissus being too compact. Doz., \$1.75; 100, \$12.00.

BUTTERCUP. (Jonquil). Very large all golden yellow Jonquil. Doz., \$1.75; 100, \$12.00.

CAMPERNELLI DOUBLE. (Jonquils). Golden yellow. Doz., \$1.00; 100, \$6.00.

CAMPERNELLI ODORUS RUGULOSUS. (Jonquils). Small cluster of golden yellow flowers. Doz., 80c; 100, \$6.00.

CAMPERNELLI, ORANGE QUEEN. (Camp.). Fine, sweet scented flower of good form; deep orange; very exquisite. Doz., \$1.75; 100, \$12.00.

General List

King Alfred.

GLORIA MUNDI. (Incomp.). Yellow perianth, orange cup. Doz., \$1.50; 100, \$10.00.
GLORY OF SASSENHEIM. (Bic.). Perianth white, trumpet golden yellow. Doz., \$2.00; 100, \$15.00.
GOLDEN BEAUTY. Golden yellow trumpet, of the deepest yellow color in Narcissus, sulphur yellow perianth; a very attractive flower. Late, free bloomer. Doz., \$2.00; 100, \$15.00.
GOLDEN HARVEST. (Yellow Trumpet). Immense yellow trumpet and perianth. One of the outstanding Daffodils of this time but not as deep yellow as Lord Wellington. Each, \$10.00.
GREAT WARLEY. (Incomp.). Pure white perianth, 5 inches across; large lemon-yellow cup 2 inches across. Remarkably beautiful flower. Largest of the class. Each, 65c; doz., \$6.50; 100, \$50.00.
HOMESPUN. (Incomp.). Perianth and crown golden yellow. Doz., \$1.50; 100, \$10.00.
HORACE. (Poeticus). One of the finest Poeticus varieties. Doz., \$1.00; 100, \$7.00.

DAFFODILS

for
Naturalizing

Pheasant's Eye Daffodils.
This variety will be among the assortment
for naturalizing.

HUNDREDS of thousands of Daffodils are used yearly for this purpose, because when once planted they continue without any care to give you immeasurable joy year after year.

Numerous varieties have proved very successful for this purpose and we will use no others. Practically all types of Daffodils contain some varieties suitable for this purpose, thereby increasing the number of varieties and adding greatly to the desire of naturalizing Daffodils.

Only sizes which are most desirable for naturalizing without continuous care are selected for your favorite garden spot. "The natural garden."

Practically any soil has been found suitable, but when planted under and among trees and in woodlands, the leaves of the trees should not always be removed, as taking away this natural food will not only injure your trees but also will prevent the Daffodils from producing as they should.

Only varieties having proved to be hardy are selected for this purpose.

Plant at least 8 inches deep but avoid places where water may collect at any time as they like drainage.

Try to plant them before October 15th or shortly thereafter, but place your order early as the demand is increasing for these bulbs at this special low price we have adopted, and we cannot take orders for less than 100 bulbs.

Per 100, \$3.50

Per 1000, \$30.00

These small Daffodils are excellent for permanent rock garden planting.

THALIA (Orchid Narcissus). An exquisite flower with 3 or 4 pure white flowers on one stem. In a class by itself. One of the finest and daintiest of the purest white. Each, 35c; doz., \$3.50; 100, \$25.00.

TRIANDRUS ALBUS (Angel's Tears). Small bulbs producing 3 to 7 small flowers, slightly drooping, on short wiry stems. Pure white. Each, 35c; doz., \$3.50; 100, \$25.00.

CYCLAMINEUS MAJOR. A yellow cyclamen-like flowered Daffodil of real beauty. Very dainty and distinct. Each, 35c; doz., \$3.50; 100, \$25.00.

GIANT SNOWDROP. Pure white cluster of dainty slightly drooping flowers. Three to four on a spike. Each, 35c; doz., \$3.50; 100, \$25.00.

BULBOCODIUM, CONSPICUUS (Hoop-Petticoat). This unusual little Daffodil is regaining its popularity, and deservedly so. Golden yellow. Very dainty. Each, 35c; doz., \$3.50; 100, \$25.00.

MINOR. The smallest yellow trumpet Daffodil outside of Minimus, which last variety is not quite as satisfactory. Each, 35c; doz., \$3.50; 100, \$25.00.

Campnelli Odorus Rugulosus.

Miniature Bulbs for Rock Gardens

Snowdrops

(*Galanthus*)

Everybody knows the Snowdrops; with their little white bells coming through the snow very early in the spring, practically the first flower to show itself after the dreariness of winter. It is a wonderful bulb for naturalizing and for every garden.

NIVALIS (Single). 40c per doz.; \$3.00 per 100; \$30.00 per 1000.

NIVALIS (Double). 50c per doz.; \$3.60 per 100; \$35.00 per 1000.

Fritillaria Meleagris.

Fritillaria Meleagris

Singular, dwarf, spring-flowering plants, bearing large, pendent, bell-shaped flowers of various colors, in yellow, white, black, purple, striped and splashed, and checkered in the most curious way. They are invaluable for pot culture, and exceedingly pretty when grown in large groups in the garden border or wild garden in a dry situation.

MIXED. Select mixtures. 50c per doz.; \$3.50 per 100; \$33.00 per 1000.

Scilla

Scilla sibirica naturalize splendidly, are cheap and so can be planted liberally, and everyone who has a garden should provide for the time when they will be excluded.

SIBIRICA, BLUE. 45c per doz.; \$3.50 per 100; \$33.00 per 1000.

SIBIRICA, SKY BLUE. A trifle lighter blue than the former with large flowers of a most beautiful heavenly blue color. 60c per doz.; \$4.00 per 100; \$36.00 per 1000.

Muscari.

Chionodoxa

(Glory-of-the-Snow)

An early flowering spring bulb for borders or rockery. Produces flower spikes bearing ten to fifteen scilla-like flowers. Perfectly hardy and should be planted close together for effect.

LUCILIAE. Deep blue, with a white center. Selected mother bulbs, 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

SARDENSIS. Deep blue. 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

Scilla Sibirica.

Eranthis Hyemalis

(Winter Aconite)

Early in spring the golden blossoms look charming, resting on an emerald-green cushion of leaves and forming a striking contrast to the Snowdrops, Scillas and Chionodoxas. The foliage remains long after the flowers, making the plant especially valuable in moist situations, such as under trees, which the Winter Aconite enjoys, and where few other flowering plants will thrive. 3 to 8 inches high. 40c per doz.; \$3.00 per 100; \$25.00 per 1000.

Eranthis Hyemalis.

Scilla Campanulata.
Rose Queen.

Scilla Campanulata

All the varieties of Scilla campanulata are splendid for naturalizing because they will flower in shady places. All have bells like small Hyacinths, forming long and graceful spikes.

CAMPANULATA ALBA MAXIMA. Large, pure white. 50c per doz.; \$3.50 per 100.

BLUE QUEEN. Large, bright blue. 50c per doz.; \$3.50 per 100.

ROSE QUEEN. Soft lilac-rose. 50c per doz.; \$3.50 per 100.

ENGLISH IRIS

(BULBOUS)

For Outdoor Planting Only

For years this most beautiful of all bulbous Iris was practically non-existent in this country and could not be imported. Fortunately we located a farm in Michigan where they can be grown very successfully and years of persistent cultivation has made us a stock equal to any in this country.

They are grown in mixed colors containing numerous shades of blue, purple, and white veined and feathered with opposite color.

We want to interest every Iris lover in this most beautiful bulbous Iris and we have dropped the price within reach of everybody.

Price: Per doz., 50c; per 100, \$3.50.

GERMAN IRIS

Garden Orchids

These beautiful Irises bloom early in the spring when the bulbs have just finished blooming, and because of their great variety of colors, they make a magnificent show. They are perfectly hardy and thrive in almost any soil; especially where they are exposed to the full sun. No home garden is complete without a few clumps scattered about, and they are also excellent for massing and bordering.

We quote only the best old varieties and new ones.

To simplify making a selection, we have classified them with the following abbreviations: "S.," standards, or upright petals; "F.," falls, or drooping petals.

It is very important that Iris orders are placed early, in order to get flowers the first season.

JAPANESE IRIS

This queen of the large-flowering Iris is very attractive. It flowers a little later than the German Irises, which adds greatly to its popularity. The flowers are of an enormous size and there are single and double varieties, both being equally attractive and suitable for cut flowers, as they really develop into a more perfect bloom if they are cut just before the bud opens and placed in the house in fresh water. The best time to plant these Irises, like all other Irises, is September, to allow them a fair time to make new roots before the winter sets in.
